

World Standards in Horse Care

Stassek DIVERSIT

"World Standards in Horse Care"

This is what the international equestrian press praised our products for more than 25 years ago first time.

And nothing has changed ever since. We have always stuck to our principles.
Today you cannot imagine a riding stable without any Stassek care products – in more than 60 countries around the world.

And the number is constantly growing!

Welcome to us!

We appreciate your visit at our homepage. We always offer you innovative care products according to the maxim:

Quality without any compromises
That's what our products stand for.
That's what we stand for.

Please, feel free to have a browse. From EQUISTAR and EQUICOOL to LAZY-MAN and QUICKSTAR
- in our range of products you will find many names that have become a synonym for efficient horse care.

We would be pleased to meet you personally and give you detailed information about all our products. Please let us know your wishes, suggestions and questions. Just call us or contact us using the contact form.

We look forward to you!

On behalf of the team of
Stassek DIVERSIT GmbH

...it's equi-galactic®!

Equistar® Spray for shiny coat, mane and tail

Equistar® creates a silky coat and impacts a glossy shine to coat, mane and tail.

This effect lasts for up to 12 days. Mane and tail remain tangle-free and the coat keeps glossy for that time – guaranteed. During that time Equistar® repels dirt and dust. Your horse is perfectly groomed and cared for – with a fascinating shine and a coat like velvet. Trust the original!

If you use Equistar® only for mane and tail, the results are awesome – Equistar®'s effect has not been known so far from other products. Equistar® entangles mane and tail without any effort. Pre-washing and time-consuming disentangling of the tail are unnecessary. Detangling takes place automatically after drying. With Equistar® there will be almost no loss of tail hair because of brushing and disentangling the tail. Grass stains on greys are a matter of the past. Even persistent sweat crusts are removed with a few strokes of the brush. Daily grooming time is considerably reduced, however the horse has a wonderful sheen.

In summer the yellow eggs of the warble fly cannot stick to the coat any longer thanks to Equistar®.

In winter the ugly and uncomfortable blanket chafed areas on the shoulders can be avoided in most cases.

If Equistar® is applied before clipping the blades are spared and the clipper head will not over-heat quickly. The coat must be absolutely dry before clipping!

Equistar® is non-toxic, pH-balanced and very skin-friendly. Skin breathing is not reduced. Skin and hair are mildly cared for. The natural skin and hair health is supported. That's why Equistar® can also be used on very sensitive or outside horses and ponies. Equistar® can be easily washed off with shampoo. It does not smear.

In view of man, animal and environment Equistar® contains almost only natural ingredients that are under constant quality control. We did not add any unnecessary emulsifiers. Therefore, please do not forget to shake well before use. Equistar® bottles are refillable, the sprayers are reusable.

The visiting card:

Application:

Preliminary washing of the horse is not necessary. Spray Equistar® sparingly on the dry or wet coat or long hair. Let it dry completely and then brush over with a soft brush. Please always wait until the hair is really completely dry. If not, Equistar® cannot develop its full effect!

Available sizes: 250 ml - 750 ml - 2 l - 5 l - 10 l - 25 l

The original product *the world trusts!*

Equilux® Quick cleanser for coat, mane and tail

For quick cleaning – ideal for greys and other light-coloured horses

Equilux® quick cleanser is a unique product for grooming. It makes possible to clean coat, mane and tail within a few minutes but without the well-known disadvantages. No need to wash the horse before application. That makes Equilux® an ideal product for the cold time of the year or if the horse is prone to get a cold.

The unpopular yellow stains on greys or the dust layer on dark coats are immediately gone. Equilux® saves a lot of grooming time. It dries quickly and does neither smear nor smell. The active agents remove stains e.g. manure stains or discolorations made by grass or dirt and create an ultra shiny coat and long hair. In addition the hair gets dirt-repellent for some time.

For nervous horses or for stain removal in the horse's face Equilux® is available as a stain roller in a little bottle. The stain roller is ideal for taking with you, e.g. to a horse show.

Equilux® is absolutely non-toxic and skin-friendly.

Skin and hair are mildly maintained, skin breathing is not reduced. In view of man, animal and environment Equilux® contains almost exclusively natural ingredients, that are under constant quality control.

Equilux® bottles are refillable, the sprayers are reusable.

We did not add any unnecessary emulsifiers. Therefore, please do not forget to shake well before use.

Application:

There is no need to wash the horse before the application of Equilux®. Equilux® quick cleanser is ready to use. Spray on the dry and roughly cleaned coat or apply with a sponge, then wipe with an absorbent cloth or kitchen tissue. Persistent stains can be treated for a second time. After drying brush over again with a dandy brush and the stain is gone. Clean mane and tail in the same way.

Available sizes: 250 ml - 750 ml - 2 l - 5 l - 10 l

Equiclean® Outdoor & Sensitiv

Special equine shampoo for dandruff and problem hair

With natural organic sulphur, beneficial oils and extracts

- ♥ Added with silver ions – inactivates bacteria
- ♥ Very mild and gentle cleansing and conditioning action
- ♥ Restores vital natural oils without leaving a greasy film on coat and hair
- ♥ Ideal for both horses kept outside and horses with skin and coat problems

... with antibacterial
silver ions!

The antibacterial effect of silver prevents many skin problems.

Equiclean® Outdoor & Sensitiv has an actively antibacterial, protective, calming and very caring action. The selected silver formula in combination with absolutely top natural raw materials promotes the normalisation of sensitive and delicate skin.

Equiclean® Outdoor & Sensitiv is the number one product for the care of greasy and dandruff-prone skin. It supports the natural functions of the skin and hair follicles and gently promotes self-regulation. Organic sulphur is often used in human medicine for allergy sufferers to alleviate non-specific skin afflictions such as dandruff, greasy skin, scurf and itching. Organic sulphur helps to loosen dandruff, has an antiseptic effect and regulates the sebaceous glands. The olive leaf extract in Equiclean® Outdoor & Sensitiv contains highly dosed oleuropein from olive leaves. Oleuropein is a natural antioxidant, which has a calming effect on the skin and improves the natural structure of coat and hair. It is also effective in preventing skin irritation. Turkey red oil generated from high-quality castor oil prevents natural oils being stripped from the coat and hair so that they don't become unkempt.

Scents can cause allergic reactions and the scent of perfumed shampoos often attracts flies. Equiclean® Outdoor & Sensitiv is therefore ideal for horses, because it is perfume-free.

Equiclean® Outdoor & Sensitiv also has a fast and lasting regenerative effect on 'show manes' that are stressed and brittle as a result of frequent plaiting. Equiclean® Outdoor & Sensitiv effect of restoring natural oils is immediately evident after washing.

Instructions for use:

Use Equiclean® Outdoor & Sensitiv just like a regular shampoo. Gently massage it into the coat and hair, leave briefly to take effect, and then rinse it out.

Available sizes: 500 ml - 2 l - 5 l - 10 l

Equigold® Premium Equine shampoo with silk protein

- ♥ PLUS olive leaf extract
 - ♥ PLUS Turkey red oil
 - ♥ Added with silver ions - inactivates bacteria
- For extra shine - for extra care - for extra volume

Equigold® Premium provides well-groomed silkiness, vitality, shine, smoothness and impressive volume. This special shampoo was particularly formulated for horse coats and hair. It has a gentle and thorough cleansing action and doesn't dry out the skin, coat and hair, even when it is used frequently. The innovative conditioning formula with beneficial oils, conditioning ingredients and silk protein nourishes the skin, coat and hair to produce a glossy coat and add volume to the mane and tail.

The antibacterial effect of silver prevents many skin problems. Equigold® Premium has an actively antibacterial, protective, calming and very caring action. The selected silver formula in combination with absolutely top natural raw materials promotes the normalisation of sensitive and delicate skin.

Equigold® Premium promotes the skin and coat's natural protective function and is also suitable for sensitive horses.

Olive leaf extract contains highly dosed oleuropein from olive leaves. Oleuropein is a natural antioxidant, which has a calming effect on the skin and improves the natural structure of coat and hair. It is effective in preventing skin irritation. Turkey red oil generated from high-quality castor oil prevents natural oils being stripped from the coat and hair so that they don't become unkempt. High-quality silk proteins form a protective coating on each individual hair to create a natural, silky sheen. Scents can cause allergic reactions and the scent of perfumed shampoos often attracts flies. Equigold® Premium is therefore ideal for horses, because it is perfume-free.

Instructions for use:

Use Equiclean® Premium just like a regular shampoo. Gently massage it into the coat and hair, leave briefly to take effect, and then rinse it out.

Available sizes: 500 ml - 1000 ml - 2 l - 5 l - 10 l

Equigold® Horse shampoo

- ♥ Mild and gentle, with natural re-greasing agents
- ♥ Added with silver ions - inactivates bacteria

Equigold® is a top quality shampoo especially designed for the hair structure and skin of the horse. Equigold® contains selected special agents, which gently and thoroughly clean the horse's hair and skin. Slightly re-greasing, this shampoo perfectly cares for the horse's coat. It is ph-neutral, perfume-free and extremely mild. It does not extract any natural substances from coat and skin and even if the horse is regularly washed, his coat and skin won't get dried out. The hair structure is strengthened from the root without any skin irritations. The antibacterial effect of silver prevents many skin problems. Equigold® has an actively antibacterial, protective, calming and very caring action. The selected silver formula in combination with absolutely top natural raw materials promotes the normalisation of sensitive and delicate skin. Equigold® maintains the natural protective function of the horse's skin and coat. That is why it can also be used for very sensitive or outside horses. Equigold® gives a soft coat with a wonderful shine. Mane and tail are easy-to-comb and get a full volume. Equigold® cares for your horse as if it was a valuable jewel.

Application:

Equigold® is applied directly on the wet hair or diluted in a bucket of water and then applied with a sponge. Massage in softly and rinse thoroughly after a short time.

In the development process we carefully paid attention to the fact that Equigold® does not produce too much foam so that it can be rinsed off thoroughly and effortlessly without any residues in the coat.

Note:

If you use Equistar® spray for coat, mane and tail after washing with Equigold®, you have a perfectly adjusted care programme with a long-term effect for your horse.

Available sizes:
500 ml - 1000 ml - 5 l - 10 l

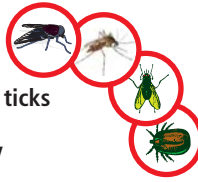

Especially mild & careful, *clearly perceptible!*

Equigold® Premium with silk protein Horse shampoo

Equisit[®] forte Insect Repellent for both horse and rider

New formulation – as safe as houses!

100% authentic, no doping ingredients, odourless and gentle to skin, protects men and horses immediately against flies, gnats, horse flies, ticks

Equisit[®] forte protects human beings over the age of 2 years reliably

- ♥ up to 8 h against all tropical and local flies and gnats,
- ♥ up to 5 h against horse flies and
- ♥ up to 4 h against ticks.

Application:

Apply evenly on exposed parts of skin; do not spray directly to the face; do not apply on skin that is under clothing or on damaged parts of skin (sunburn). Avoid contact with eyes and mucosa.

Shake well before use.

The protective effect starts instantly after the application!

Equisit[®] forte protects horses reliably

- ♥ up to 24 h against all flies, gnats and horse flies and
- ♥ up to 4 h against ticks.

Application:

Spray directly on the coat, apply to the horses face by hand or use a soft cloth, do not apply under the saddle.

Before leaving the horse to pasture, make sure that it is dry before it may roll.

Avoid contact with eyes and mucosa.

Shake well before use.

Protection and recreation for

- ♥ horse and rider
- ♥ driver and turnout
- ♥ hunters and fishermen
- ♥ farmers and countrymen
- ♥ golfers and hikers
- ♥ jogger and Nordic walker
- ♥ the whole family

Available sizes: 500 ml, 2 l, 5 l, 10 l

Equimin[®] Natural fly protection

- ♥ on a natural basis
- ♥ waterproof and sweat resistant
- ♥ reliable protection for at least 6 hours

Feel good, lean back, enjoy the summer and forget about the flies!

With Equimin[®] summer is a real treat for your horse and yourself!

Equimin[®] natural fly protection contains almost exclusively natural active agents. The carefully developed formula is regularly adapted to the latest scientific findings based on environmental conditions.

Equimin[®] natural fly protection reliably protects your horse for at least 6 hours from pests. By ordinary conditions Equimin[®] is waterproof and sweat resistant.

Equimin[®] is absolutely non-toxic and can also be used on very sensitive horses. It has been tested for skin tolerance and is regarded as very caring. Thanks to these properties it can improve the well being of sweet-itch horses. Equimin[®] is made only of best raw materials that are subject to constant high-class controls.

Equimin[®] bottles are refillable and the sprayers are reusable. We do not use any unnecessary emulsifiers. That is why you must not forget to shake well before use.

Application:

Spray Equimin[®] sparingly onto the areas to be protected or use a sponge. In order to increase Equimin[®]'s effectiveness out in the fields, let it work in and dry for a moment before the horses go out and are allowed to roll. Equimin[®]'s slight odour vanishes after a few minutes so that it is almost odour-neutral. For sweet-itch horses with chafed areas Equimin[®] should only be used after these spots have healed. Otherwise the natural oils could cause an unpleasant burning sensation on these spots. For the same reason please do not apply to mucous membranes.

Note:

Concerning the special care of sweet-itch horses please also read the product description of Equibona[®] care balm and Equidoux[®] ointment against chafing.

Available sizes:
500 ml - 750 ml - 2 l - 5 l - 10 l

100% authentic - no doping !

Equistop® Anti-chew spray

Protects everything from chewing horses and ponies thanks to the bitterest substance known to man.

Non-toxic, clear and non-fragranced; can also be used on the tail of broodmares.

It is the bitterest active agent known to man that makes this anti-chewing fluid so effective. Due to its optimum combination of active agents **Equistop®** can be used on all surfaces where horses chew including bandages, blankets, wood etc. It also stops cribbing. However, if you have a crib-biter you should try to avoid the cause for this vice and change his living conditions first. **Equistop®** should only be used in addition to a change of his life style.

Equistop® is also a great help in the rearing of foals, e.g. it can be sprayed onto the dam's tail in order to stop the foal from chewing it. **Equistop®** is non-fragranced, clear and absolutely non-toxic. It is non-staining and even if used on a regular basis, it is completely harmless to animal, man and environment.

Equistop® only contains top quality ingredients under a permanent strict quality control.

Equistop® bottles are refillable and the sprayers are reusable.

Application:

Equistop® is ready to use. Paint or spray richly on the surfaces and objects you want to protect. If it's necessary, the application can be repeated. If **Equistop®** is applied on the tail, it must be washed out with **Equigold® Premium** or **Equiclean® Robust & Sensitive** horse shampoo prior to the next disentangling of the tail.

Note:

If by mistake a little bit of **Equistop®** should have got into your mouth, the bitter taste will vanish by chewing a piece of chocolate.

Available sizes: 450 ml - 2 l - 5 l - 10 l

Highly efficient, *with sure success!*

Equidoux® Ointment against rubbing

For coat, mane and tail

Here it is, our remedy against rubbing - revolutionary and kind to the skin!

Equidoux® is a tincture against the rubbing of coat, mane and tail unless it is caused by a disease. It is a quick and reliable remedy against chafed docks and crests. It quickly puts an end to the problem of itchy feathers with many compact baroque-type breeds or outside horses and ponies, so that they can relax and give up their constant stamping. **Equidoux®** is a mild care product with extraordinarily soothing properties. Due to the caring components the formation of dandruff is reduced. When you use **Equidoux®** for skin care, the skin is much more insensitive to external influences that could cause itching. That's why **Equidoux®** also increases the well being of sweet-itch horses. If it is used regularly, many of these horses do not show their well-known problems in summer any longer. Competitive riders too appreciate **Equidoux®**. It prevents their horses from getting brittle hair even if their mane is often plaited and dry.

Equidoux® can be used before or after plaiting. The mane is immediately elastic and supple again. At the end of the competitive season the mane will be as full and thick as at the beginning.

Equidoux® is based on selected natural ingredients, which have been processed under strict quality checks. No unnecessary emulsifiers are added.

Equidoux® is absolutely non-toxic and gentle to the skin.

Application:

If possible apply (spray or squirt) **Equidoux®** several times a day onto the itchy parts, e.g. dock, crest or coat and rub in gently.

We recommend using a plastic currycomb or a dandy brush to make sure that **Equidoux®** gets through the long hair to the skin. The effect is immediate.

Available sizes: 500 ml - 5 l

Equistop®
Anti-chew spray

Equidoux®
Ointment against rubbing

Equitherm® Thermal wraps

For cooling or heating without moisture

Relaxing heat or refreshing coolness - reusable **Equitherm®** thermal wraps are ideal for cooling or heating your horse's legs. The cooling or heating effect lasts for several hours. Due to their anatomical shape they fit remarkably well. Two attached Velcro straps make fastening easy. For cleaning simply hose off or wash the thermal wraps.

Equitherm® thermal wraps will neither soften nor damage the skin and no hair loss will occur, which was often the case using other methods.

Heating:

Equitherm® thermal wraps are simply put in warm water (up to 80 °C) or into the microwave for 30 seconds until the desired temperature is reached.

Cooling:

For cooling purposes **Equitherm®** thermal wraps are put into the fridge for some hours. However, avoid freezing as plastic and foil might become hard and brittle and could even break if the temperature is too low. Should the wrap be frozen, do not flex or stretch it but let it slowly melt again.

Note:

If the temperature is too high or too low for the horse, you can put a cloth under the thermal wrap. For better fastening and increased protection from damage you can put a bandage over the thermal wrap. An additional bandage pad over the thermal wrap extends the application time due to better insulation.

The thermal gel is absolutely non-toxic.

Of course, the rider him/herself can use **Equitherm®**, too.

Equicool® Leg wraps

- ♥ cooling for several days
- ♥ repeated usage
- ♥ simple activation in cold water
- ♥ extra durable material
- ♥ light-weight and small, ideal to take with you

Even in the hottest summer or after an exercise **Equicool®** leg wraps provide pleasant and lengthy cooling and refreshing to your horse. Its well being is considerably enhanced, at home or e.g. at a show. Ice or cooling in a freezer is not necessary.

The **Equicool®** system is based on special cooling polymers that can absorb water up to 1000 times their own weight. The water is bound by the polymers and evaporates only slowly. This means a lengthy cooling of up to 5 days. The moisture is stored so well that **Equicool®** leg wraps do not drip. Even after long-term usage skin and coronet band will not soften up.

Equicool® leg wraps are remarkably easy and convenient to use. They can be used repeatedly. When folded, the leg wraps are so small and lightweight, that they fit into every jacket pocket. To activate them simply put them into clean water for 10 minutes at the most. Due to the enlarged volume of the polymers the leg wraps now have the size of proper cooling boots. If the leg wraps are not used for a longer time, they do not need more space than two packages of paper hankies (after drying). If required, simply put the leg wraps in water to activate the polymers again.

Of course, all **Equicool®** products are 100 % non-toxic and environment-friendly.

How to use:

Unfold the leg wraps and put them into cold and fresh water for no longer than 10 minutes. The polymers will be sufficiently activated and the leg wraps are ready for use. If necessary the gel can be evenly distributed in the chambers by squeezing. The chambers do not have to be completely filled to be effective. If the leg wraps stay in the water for too long, it is possible that superfluous gel seeps through the material because of an over-activation of the polymers. This is absolutely harmless and you can simply wipe it off with a cloth. It has no effect on quality and effectiveness of the leg wraps.

You can also use Equicool[®] leg wraps for thermal therapy. Put them into warm water (60 °C) or into the microwave for short intervals. In order to avoid burns put a thin cloth underneath the leg wraps.

Avoid contact with gasoline, alcohol, salt, disinfectants or medicine as this might destroy the polymers in the boots, so that they cannot be activated any longer or at least not to their full size. Due to the Velcro straps Equicool[®] leg wraps fit very well. If desired you can put a thin damp bandage over the leg wrap, but not too firmly. Then they will not cut in due to the gel padding.

Equicool[®] leg wraps are designed for use at rest. That means they should be used in the stable or for walking the horse, e.g. during the compulsory breaks of a contest.

As the evaporation is automatically controlled by the body or environmental temperature, it is possible that after a few hours the cooling effect may appear to be reduced. However, due to the continuous evaporation there is a steady but individually different cooling.

Storage:

Let your Equicool[®] leg wraps dry completely, which may take up to several days. Do not store your cooling boots in a closed container or plastic bag.

Available sizes:

Standard (short size – cools cannon bones and tendons)

DeLuxe (long size – cools from the coronet band up to carpus or hock)

Equicool[®] leg wrap De Luxe

Comparison:

Equigel® Cooling and soothing gel

No camphor – no doping

Equigel® is produced according to the SOFT-SLIDE-PLUS method developed by us (it sticks to the coat and does not run down). It is a deep-care product for cooling and refreshing the horse's legs after exertion. Its deep action is quick, reliable and long lasting. The carefully selected cooling ingredients and the aromatic oils well known for their caring properties give the horse soothing refreshment right after application.

This refreshment improves the blood circulation and a very effective relaxation of muscles, tendons and joints starts. The refreshing and reactivating components of Equigel® are easily noticeable. You can use Equigel® before or after an exertion and the effect is quick and reliable. Despite its deep action Equigel® contains no camphor and can be used for competition horses, too.

Equigel® is absolutely non-toxic.

Application:

First make sure that the areas where you want to apply Equigel® are clean and absolutely free of any other remedies or drugs. Apply Equigel® and rub in gently. For a long lasting effect apply richly a second layer. Thanks to the SOFT-SLIDE-PLUS method Equigel® sticks to the coat without running down and stays on the coat even as a thick layer. Do not use a bandage after application. In case of a long-term use the skin should be washed with Equigold® Premium shampoo now and then. Before the next application the skin should be completely dry again.

Equigel® must not be applied to mucous membranes or irritated skin.

Note: The rider can use Equigel® for him/herself and his/her family, e.g. for a seized-up back. You will be fascinated by the relaxing and soothing effect of Equigel®.

Available sizes: 500 ml - 1000 ml

Equigel® Comfort

2-phase regeneration gel

With aloe vera, rosemary oil and menthol

With practical dispenser
Without camphor – no doping

1st phase: refreshing coolness

2nd phase: relaxing warmth

Equigel® Comfort provides fast and lasting reinvigoration and relaxation for horses after training. Aloe vera, rosemary oil and menthol have a beneficial cooling effect in the first phase. In the second phase, heat is generated to promote deep and animating relaxation.

Ensure that the areas to be treated are clean and especially that they are free from other substances before applying Equigel® Comfort.

Apply the gel and massage gently. Please do not apply Equigel® Comfort to mucous membranes or broken skin. Do not bandage it if the horse's skin is very sensitive.

Note: Allow yourself the beneficial use of Equigel® Comfort. It is very efficient and you will be satisfied by its stimulating and relaxing effect.

...it's equi-galactic®!

Available size: 250 ml bottle with dispenser

reine Entspannung - kein Dopingmittel

Equidura® Hoof balm

Promotes hoof growth and elasticity of the hoof horn

This hoof balm is designed for all problem hooves!

Whether too soft or too hard - Equidura® hoof balm controls the horn moisture of any hoof.

Equidura® hoof balm with bay oil and further highly effective and caring ingredients improves the elasticity of the hoof horn and keeps it healthy. Equidura® does not only put a layer on the hoof surface, but it penetrates deeply into the hoof wall and hardens the hoof from inside. At the same time it maintains the respiration of the hoof horn.

Equidura® hoof balm reliably protects the hooves from becoming dry in summer or because of a dry woodchips bedding as well as from softening because of being exposed to moisture as e.g. water and urine.

Equidura® restores the moisture content of the hoof horn in a natural way, and the horn stability improves. The hoof horn recovers its elasticity, which means a prevention of cracks as well as of common hoof problems like brittle hooves. If the horse is shod, the horseshoes hold much longer.

For production we only use top quality raw materials.

Application:

According to the condition of the hooves Equidura® is applied as follows:

Hooves are too dry:

Some minutes before application let the hooves soak in water. Then apply Equidura® to hoof wall and coronet only. No hoof balm on sole and frog.

Hooves are too soft:

Apply Equidura® to the dry hooves and the coronet band. Apply also to hoof sole and if necessary to the frog. The frog has to be dry and healthy. For outside horses or if riding on wet ground, apply Equidura® prior to riding.

Normal hooves:

For care and preservation apply daily to hoof wall and coronet band.

Note: Daily use improves strength and elasticity of the hooves.

If you also apply a 2 cm layer of Equidura® in the coat above the coronet band, it will run down along the hoof wall for hours because of the body warmth. This makes it a very effective long-term care.

If your horse has hoof problems, please also read the product description of Equisolid® special hoof lotion for frog and sole.

Available sizes: 500 ml - 1000 ml - 2,5 l - 5 l - 10 l

Equisolid® Special lotion for frog and sole

- ♥ Strengthens the hoof horn and removes foul smell
- ♥ Added with silver ions – inactivates bacteria
- ♥ Helps the hoof to regain an elastic horn structure in a few days

It has never been so easy for you to help the frog and sole of your horse's hooves to regenerate!

Equisolid® special lotion is a very effective agent for the permanent care of the frog and the sole of the hoof. Equisolid® has a horn strengthening effect that develops even in persistent or other problem cases after only several days. You will be surprised about the quick effect! The hoof horn gets hard and clean immediately. Smearly and foul-smelling areas in the horn disappear within a short time. The horn maintains its breathing activity and elasticity. Equisolid® does not seal up or fill the pores of the hoof horn as it happens with hoof tar. It creates a natural protection against any bad influences as e.g. moisture or manure. Equisolid® is not only suitable for the care of the frog, but also for strengthening the whole sole of the hoof. Even in cases with a porous or brittle white line Equisolid® often shows good results. If the shoes did not keep because of poor horn quality, most of the horse can be shod again without any problems.

The antibacterial effect of silver prevents many hoof problems. Equisolid® has an actively antibacterial, protective, calming and very caring action. The selected silver formula in combination with absolutely top natural raw materials promotes the regeneration of weakened hooves. Problem hooves with therapeutic shoeing as e.g. pad or bar shoes can be protected with Equisolid® against any problems or softening beneath the shoes.

As Equisolid® is liquid, it reaches the deepest spots and can develop its full effect. Equisolid® is available either with a nozzle or a sprayer.

Application:

In case of frog problems apply Equisolid® deeply into the grooves of the frog or the clefts with help of the nozzle. If the horse has therapeutic shoes, application is the same. For care of the sole spray Equisolid® on the sole. Hold the hoof up for a moment after application in order to let Equisolid® work in into the deep clefts.

Recommendation:

For an optimum hoof care we also recommend Equidura® hoof balm with laurel oil.

Special lotion for frog and sole

Equibona®

Protective natural care balm for the skin

Many bacteria that cause skin problems have no chance on a soft and well cared for skin.

Equibona® effectively protects and cares for skin and coat of the horse. This carefully developed care balm is produced from purely natural raw materials. Equibona® is an irreplaceable care product for e.g. lips, corner of the mouth, bend of pastern, dock, crest and chafed areas. Its use is almost unlimited. Equibona® reliably protects the bend of pastern from moisture and irritating stable muck. It makes the skin soft and supple and restores its elasticity in a very short time.

A cared for skin like this is more resistant to skin problems and soreness. Young horses are better accustomed to the unfamiliar bit. Equibona® is also a wonderful care product for the udder of broodmares.

The balancing and regulating moisture care prevents from itching due to irritated, dry or softened skin.

You can also use Equibona® for your family, e.g. for the hands, elbows and irritated skin.

Application:

Apply to the skin and if necessary rub in gently. Thanks to its caring properties Equibona® can also be applied in a thick layer on the areas that sweet-itch horses have already chafed sore. The thick layer makes it impossible for insects to sit on the irritated skin.

Note:

Available size: screw-top box 250 ml

EquiSTEP®

Hoof Oil with Oil of Laurel, Aloe Vera and Lanolin

Within only 3 days you will notice the difference!

EquiSTEP® protects - cares - regenerates - strengthens - promotes hoof growth

EquiSTEP® reliably and quickly regenerates and strengthens the entire hoof. EquiSTEP® hoof oil maintains optimum hoof moisture, dry hooves become elastic and solid again. This makes EquiSTEP® the ideal health care for too dry and brittle as for too soft, crumbly and weak hooves.

The daily use of EquiSTEP® promotes solving hoof problems like cracks, splits and damaged hoof structures, improves shoe retention and prevents infection, rot and putrefaction. Its excellent caring agents deeply penetrate the hoof horn up to the white line tissue, effectively supplying it with natural amino acid and valuable mineral.

EquiSTEP® does not seal the pores, it allows the hoof horn to breathe naturally. EquiSTEP® successfully helps the hoof horn to maintain its natural barrier function against bad external influence and bacteria. In addition, laurel oil promotes hoof growth. The result is a healthy hoof with a non sticky and shiny finish.

Horse and rider will be happy - the farrier will be amazed!

Application:

EquiSTEP® should be used for acute hoof problems and all year long preventively for any hoof. Apply with internal brush on the hoof wall, the coronet band and, if necessary, on frog and sole.

Available sizes: Original bottle with and without inside brush 450 ml, canister 2,5 l – 5 l – 10 l

Quickstar® Detergent for leather and wool

Well ventilated and waterproof garment, down, silk, fleece and fur

Wash, hang up to dry – and be happy!

Quickstar® a phosphate-free re-greasing special detergent, is especially designed for delicate fabrics, as e.g. leather or leather-coated clothes. It is ideal for washing leatherjackets, motorcycle clothes, breeches, car seat, baby and other fleeces, silk, wool, neoprene, special high-tech fabrics and micro-fibres.

Quickstar® washes your breathable and waterproof horse rugs without them losing their special properties.

Down-filled jackets, sleeping bags and bedclothes can be washed without any problems or going lumpy. Woollens won't become felted. They look like new after washing.

Quickstar® can also be used as a very mild detergent for all other laundry.

Equifix® Saddle Soap

- ♥ For smooth, rough and nubuck leather
- ♥ Cleans even heavily soiled leather
- ♥ Restores a wonderful suppleness to leather

If you once have walked in shoes cared with Equifix® Saddle Soap you will never do without!

Equifix® Saddle Soap is a mild but very effective leather soap for the pore-deep cleaning of dirty leather. The mild and gentle cleaning is based on purely biological ingredients. Thanks to the deep cleaning action the leather is wonderfully soft and supple immediately after cleaning – but without making it go baggy. The active agents of Equifix® Saddle Soap deeply penetrate into the capillary structure of the leather instead of working only on the surface. Of course, Equifix® Saddle Soap can be used for all your leather tack. Even new riding boots get smooth quickly and can be worn in without getting aching feet. Equifix® Saddle Soap is also suitable for any smooth leather or suede item in the household, e.g. shoes, leather jackets or furniture.

Application:

Quickstar® is suitable for hand or machine washing.

In case of machine washing use the programme for delicate fabrics up to 30 °C. Or see manufacturer's washing instructions in the garment. Quickstar® cleans your washing even in the cold-wash programme. Use short spin cycle for machine washables, no spinning for neoprene. Quickstar® is very economic in use. A maximum of about three spoonfuls per washing will do.

Hand washing: Don't wring, only squeeze out lightly. Let the washing dry completely at room temperature. You can take away the typical drying stiffness of the leather by tumbling it. Down can be dried at low temperature (up to 50 °C) until it is just slightly damp (= rotary iron dry on the setting of the tumbler). Shake well after drying.

Available sizes: 250 ml - 500 ml - 2 l - 5 l - 10 l

Application:

Take a wet sponge and go over the saddle soap several times. Then wipe the leather. Let the foam soak in for a short while and then wipe off any excess foam with a soft cloth. Even tough soiling will disappear and the leather is wonderfully soft and supple. For sensitive leather, first test on a small hidden area before cleaning.

Note:

We recommend the alternate use of Equifix® Leather Oil and Equifix® Leather Balm. For a grease-free cleaning (e.g. seat of saddle or leather furniture) we recommend Equifix® Triplex Leather Care. And if you are in a real hurry: Equifix® Lazy-Man!

Available size: 400-ml jar with applicator sponge

Take it easy - no problem with cleaning & care!

Quickstar®
Detergent for leather and wool

Equifix®
Saddle Soap

Equifix® 3-Phase Leather Soap with mildew protection

No more trouble with mildew on saddle equipment!

No mission impossible! Here it is – our universal weapon against dirt and mildew!

Equifix® 3-Phase Leather Soap is armed for profound cleaning and re-greasing care of soiled leather, and even to exterminate mildew on leather goods. But that's not all: thanks to a special agent it is able to prevent new attacks of mildew. As **Equifix® 3-Phase Leather Soap** is liquid, it reaches the most hidden places, where new mildew may develop.

Equifix® 3-Phase Leather Soap is an innovative product for the cleaning, care and protection of smooth leather.

Phase 1 gently and thoroughly cleans dirt and any mould from the leather.

Phase 2 provides the leather with all the nourishment it needs. It makes the leather supple and impregnates it pore-deep with vital oils.

Phase 3 activates a special protective formula, which provides effective, long-term protection against bacteria and considerably delays the formation of mildew.

Application:

Apply a generous amount of the **Equifix® 3-Phase Leather Soap** with a cloth or sponge and gently massage it in. **Equifix® 3-Phase Leather Soap** can also be sprayed onto the leather with a spray jet. Leave to take effect briefly, then remove the excessive soap with a lint-free cloth. Follow the same procedure when using **Equifix® 3-Phase Leather Soap** after ordinary saddle soap or leather balm/oil. Regular use prolongs the protection against mildew. Suitable for any kind of smooth leather.

Available sizes: 500 ml - 2 l - 5 l - 10 l

Equifix® Triplex Leather Care

- ♥ Grease- and oil-free
- ♥ For smooth, rough and nubuck leather

From now on it is a pleasure to clean riding boots, shoes, tack and even leather clothes or furniture. Forget about ugly snow stains on your shoes as well as about stains on your leather furniture or your favourite leather jacket. You can also forget about the laborious polishing off of excess grease and oil after cleaning the saddle seat or the seat of your leather sofa or armchair.

Combining several leather care products in one **Equifix® Triplex Leather Care** has the following main properties: It removes sweat, dirt and salt crystals from the leather. It penetrates deeply into the capillary structure of the leather, but without blocking the pores. And above all: It doesn't contain any grease or oil!

Equifix® Triplex Leather Care increases the stability of the leather in the pull and pressure direction and so ensures a long useful life of your tack. The leather fibre gets an effective protective layer and is thoroughly waterproofed. The colours are strengthened. As **Equifix® Triplex Leather Care** is grease-free, there won't be any soiling of your clothes by greasy residues.

This is especially important for competitive riders who want to clean their saddle between two parts of a contest. But this makes it also very suitable for leather furniture, too.

Equifix® Triplex Leather Care is suited for smooth and rough leather as well as for nubuck leather and it makes possible an effortless cleaning of chaps, too.

Application:

Apply to the leather with a soft cloth. Let work in shortly and then wipe off any excess leather care with a clean cloth.

Available size: 500 ml

Equifix® Leather Balm with beeswax

- ♥ Nourishes
- ♥ cares
- ♥ protects and waterproofs any kind of smooth leather

Nothing is more annoying than getting your feet wet during a walk because your shoes are not sufficiently waterproofed. Nothing is more irritating than seeing the saddle you just polished looks as strained as before. All this won't happen to you with **Equifix® Leather Balm**!

Equifix® Leather Balm with beeswax is a guarantee for top care and treatment. It works in easily and is resin- and acid-free. The selected ingredients carefully remove minor soiling and guarantee a strong waterproofing.

Equifix® Leather Balm with beeswax protects the leather surface for a long time and makes it resistant to external influences

Application:

Apply **Equifix® Leather Balm** with a soft cloth. Let the balm work in shortly and wipe off any excess leather balm with a clean cloth. In case of heavy soiling we recommend prior cleaning with **Equifix® Saddle Soap**.

Note: For very hard and brittle leather we recommend **Equifix® Leather Oil**. For a grease-free cleaning (e.g. seat of saddle or leather furniture) we recommend **Equifix® Triplex Leather Care**. And if you are in a real hurry: **Equifix® Lazy-Man!**

Available size: screw-top box 500 ml

Equifix® Leather Oil with beeswax

- ♥ Nourishes
- ♥ cares
- ♥ protects and waterproofs any kind of smooth leather
- ♥ Especially suited for hard-worn or hard leather

Don't despair at hard-worn leather!

Equifix® Leather Oil with beeswax is a leather care product for the greatest demand. It has a replenishing effect and is especially suitable for hard-worn, dried up and cracked leather. Breaking strength, suppleness and the appearance of the leather are considerably improved.

Equifix® Leather Oil with beeswax is a guarantee for top care and treatment. It works in easily and is resin- and acid-free.

The carefully selected ingredients remove minor soiling and guarantee a strong waterproofing. The genuine beeswax protects the leather surface for a long time and makes it resistant to external influences. The natural hydrophobic components make the leather resistant and waterresistant.

Application:

Apply **Equifix® Leather Oil** with a soft cloth. Let the oil work in shortly and wipe off any excess oil with a clean cloth. In case of heavy soiling we recommend the prior cleaning with **Equifix® Saddle Soap**.

Note:

Alternately use **Equifix® Leather Oil** and **Equifix® Leather Balm** for your tack. If the leather has become very hard, we recommend prior cleaning with **Equifix® Saddle Soap**. You will be delighted about the new suppleness of the leather. For a grease-free cleaning (e.g. seat of saddle or leather furniture) we recommend **Equifix® Triplex Leather Care**. And if you are in a real hurry: **Equifix® Lazy-Man!**

Available sizes: 500 ml - 2,5 l - 5 l - 10 l

Equifix® Oil Soap

Cleans and cares for leather, brushing boots, grooming equipment, bits, halters and other tack

Now at last – the general cleaning and care product for the stable!

Equifix® Oil Soap is the unique all-round cleaning and caring agent in the stables! As far as their properties and effectiveness are concerned, many oil soaps have been manufactured for industrial and similar purpose and therefore they are not suited for equestrian use. However, **Equifix® Oil Soap** comes up to the highest demand of the rider. It both cleans and cares for almost any material. Leather tack as e.g. saddle and bridles become soft and smooth and get a protective layer against dirt, water and sweat. Even hard-worn or rough leather will restore its suppleness and resistance. **Equifix® Oil Soap** is designed for effortless cleaning of equipment made out of plastic, metal or fabric as e.g. brushing boots, halters, grooming equipment, bits etc. Even feed bins and mangers can be cleaned without any difficulty.

Application:

For straight use apply **Equifix® Oil Soap** with a soft cloth or sponge. Let it work in shortly and wipe off any excess oil soap with a clean cloth. Or dilute one to five soup-spoons (according to the degree of soiling) in 10 litres of water and wash the desired item in this dilution. Then dry off with a cloth.

Note:

In cases of very hard and brittle leather we recommend the application of **Equifix® Leather Oil** or **Equifix® Leather Balm** after cleaning. Feed bins and mangers should be rinsed off with water in order to prevent any temporary change in taste after being cleaned with **Equifix® Oil Soap**. For a grease-free cleaning (e.g. seat of saddle or leather furniture) we recommend **Equifix® Triplex** leather care. And if you are in a real hurry: **Equifix® Lazy-Man!**

Available sizes: 500 ml (liquid) – 1000 ml (solid)

Equifix® Lazy-Man

Automatic and easy leather care
The "Equistar" of leather care

- ♥ Efficiently cleans and greases your tack within two minutes
- ♥ Not necessary to take apart your bridles etc.

For lazy people and all wannabes!

You won't believe it until you have tried it out! **Equifix® Lazy-Man** is a totally new combination of saddle soap and leather oil and has not been available on the market before. Thanks to **Equifix® Lazy-Man** it is now absolutely easy to clean, grease and care for your tack from time to time. It only takes 2 minutes! Imagine: Take the bridle off after riding and just move it back and forth three times in a bucket with **Equifix® Lazy-Man** and water. Then hang it up in the tack room as usual. The bridle will be as clean as if cleaned with saddle soap and greased as if greased with leather oil. Thanks to **Lazy-Man!**

How to use:

Pour 4 caps of **Equifix® Lazy-Man** into a bucket with 5 litres of water and let it dissolve like washing-up liquid. Dip the tack into the water and move it back and forth three times (approx. 30 seconds). Take it out of the water and put it into the tack-room. Finished! Your tack is now cleaned and greased and after 15 minutes you can use it again. Bridles, halters etc. do not need to be unbuckled. Metal parts like bits or snaffles are also cleaned. Boots and saddles are wiped over with a sponge. The time of laborious and time-consuming leather care is over.

At a show, after a ride-out or a carriage-ride **Equifix® Lazy-Man** provides you with clean and well cared for tack – quick and easy.

Available sizes: 1000 ml - 2 l - 5 l - 10 l

Equintos® SmellEX Smell absorbent

Being odour-neutral itself it destroys any smell immediately and finally, e.g.

- ♥ ammonia smell in the bedding
- ♥ any smell in the feed box
- ♥ mildew and mildew smell
- ♥ smell of excrements, e.g. of mice
- ♥ for living rooms, attic and cellar
- ♥ cabinets and carpets
- ♥ vehicle interior
- ♥ dog kennel, dog basket, cat litter box
- ♥ etc.

This smell absorber is a real genius: Equintos® SmellEX smell absorber is a very effective and versatile all-round product. Its use is almost unlimited. The smell is not only covered up, but also encapsulated and absorbed by so-called odour-eating molecules. The smell is destroyed forever and without any residues. The effect is immediate. Furthermore, Equintos® SmellEX disinfects, deodorises and destroys most of the harmful fungi and bacteria. It does not only absorb the smell of mildew, but at the same time it destroys the mildew itself and prevents its reformation. Harmful ammonia gases in the stable are not only covered up, but also efficiently destroyed. If used in a feed box, the taste of the feed is not impaired.

Of course, Equintos® SmellEX is absolutely non-toxic and can be used anywhere.

The bottles are refillable and the sprayers are reusable.

Application:

Spray a thin layer of Equintos® SmellEX on the smelling areas and the unpleasant smell disappears forever.

Available sizes: 750 ml - 2 l - 5 l - 10 l

Bronchifresh® Stable spray

The smell of open air of the forest combined with the perfume of precious ethereal oils - what a beneficial effect for your horse and yourself on a dark and misty winter's day!

Bronchifresh® is a spray for the stable and its surroundings. Due to its high-quality natural ingredients and volatile oils it produces a fresh and beneficial stable climate for the horse. Bronchifresh® makes a bit of nature enter your horse's stable. The volatile oils are gradually released through evaporation. The improved air quality in the stable substantially increases the horse's well being.

Bronchifresh® is an absolutely non-toxic care product.

Application:

Bronchifresh® is sprayed onto the bedding or the walls. In order to get the utmost effect, spray Bronchifresh® just where the horse holds his head most of the time. The horse will inhale the valuable ingredients for many hours. We recommend spraying Bronchifresh® on the wall above the trough or near the hay-net. In winter it is highly effective to spray it onto the chest part of the rug. 2-3 squirts will do.

Available sizes: 250 ml - 2 l - 5 l

Freshness and well-being - *in your stable!*

Equintos® SmellEX Smell absorbent

Bronchifresh® Stable spray

Equisnacks® Reward Snacks for horses

(...also very delicious for dogs)

Entering the stable you are greeted with a joyful neigh? Let there be at least two neighs in future, because **Equisnacks®** is the real treat for your horse!

Any horse loves **Equisnacks®**, the high-quality and aromatic horse treat. The balanced combination of their ingredients makes them digestible. **Equisnacks®** are enriched with essential vitamins. That is why they are so healthy.

Don't reward your horse with anything; just give him a real treat with **Equisnacks®**!

Available sizes: 1 kg - 3 kg

Perryclean ...with SILVER IONS-inactivates bacteria! Dog Shampoo

- ♥ Species appropriate, without perfume
- ♥ Mild and gentle, with natural re-greasing agents
- ♥ With SILVER IONS – inactivates bacteria

Perryclean is a top quality shampoo especially designed for the hair structure and the delicate skin of your dog. **Perryclean** contains selected special agents, which gently and thoroughly clean the dog's coat and skin. Slightly re-greasing, this shampoo perfectly cares for the horse's coat. It is ph-neutral, perfume-free and extremely mild. It does not extract any natural substances from coat and skin and even if the horse is regularly washed, his coat and skin won't get dried out. The hair structure is strengthened from the root without any skin irritations.

Perryclean supports the natural protective function of the dog's skin and coat. It creates a soft coat with a wonderful shine. After washing, the coat is easy to comb and gets a full volume. Scents may cause allergic reactions and the scent of perfumed shampoos often attracts insects. **Perryclean** therefore is ideal for dogs, because it is perfume-free. The selected silver formula in combination with absolutely top natural raw materials promotes the normalisation of sensitive and delicate skin and inactivates bacteria.

Application:

Perryclean is applied directly on the wet hair or diluted in a bucket of water and then applied with a sponge. Massage in softly and rinse thoroughly after a short time.

By the way, not only for yourself, also for your dog warm water is much more comfortable.

Available sizes: 500 ml, 5 l, 10 l

Perrylux Beauty and Detangling Spray

Perrylux detangles the coat of your dog automatically and keeps it tangle-free for several days. The coat of your dog is perfectly cared for – with a fascinating shine and a coat like velvet. **Perrylux** repels dirt and dust for several days and even prevents against ticks. **Perrylux** averts electrostatic charging of the hair by brushing it. Daily caring time is considerably abbreviated. Even for long-haired dogs brushing no longer is an ordeal. **Perrylux** gives a brilliant sheen and accentuates the colour of the hair. After clipping, the immediate application for instant embellishment is proven. **Perrylux** supports the natural protective function of skin and coat. **Perrylux** is non-toxic, pH-balanced and extremely gentle to skin. That's why it is applicable for cats, e.g. Persians, without any problems.

Application:

First brush roughly to remove dirt and sand, preliminary washing is not necessary. Then spray **Perrylux** sparingly in a thin layer on the coat, **let dry completely** and then brush over with a soft brush. Please always wait until the hair is really completely dry. If not, **Perrylux** cannot develop its full effect.

Available sizes: 450 ml, 2 l, 5 l, 10 l

Perrystop Anti Chewing Liquid

It is the bitterest active agent known to man that makes **Perrystop** anti-chewing liquid so effective. **Perrystop** protects furniture, dog baskets, door frames, dog kennels and any objects, where dogs might chew or bite. So it is very helpful to prevent puppies from biting and chewing, particularly also in dog breeding. **Perrystop** is not fragranced, clear and absolutely non-toxic. It does not stain and even if used constantly, it is completely harmless to animal, man and environment.

Application:

Perrystop is ready for use. Paint or spray richly on the surfaces and objects you want to protect. If it's necessary, repeat the application.

...it's perry-galactic!
